***About Potash West***

*Potash West (ASX:PWN) is an exploration company focused on developing potassium-rich glauconite deposits in West Australia's Perth Basin. The Company aims to define a substantial resource base and investigate how best to recover potash from the mineral. The project is well situated in relation to infrastructure, with close access to rail, power and gas. A successful commercial outcome will allow the Company to become a major contributor to the potash and phosphate markets at a time of heightened regional demand.*

*The Company has a major land holding over one of the world's largest known glauconite deposits, with exploration licenses and applications covering an area of 2,700km<sup>2</sup>. Previous exploration indicates glauconite sediments are widespread for more than 150km along strike and 30km in width. Current JORC compliant Indicated Mineral Resources stand at 241Mt at 3.0% K<sub>2</sub>O, including 120Mt at 4.6% K<sub>2</sub>O amenable to processing by the K-Max process and 90Mt at 2.65% P<sub>2</sub>O<sub>5</sub> of phosphate mineralisation.*
