## **BREAKAWAY RESEARCH REPORT**

Breakaway Research recently released a commissioned research report covering Potash West. To view a copy of the report, please visit our website at [www.potashwest.com.au](http://www.potashwest.com.au) under Investor Centre – Research Reports.

Breakaway Research is an independent research company. It is a member of the Breakaway Investment Group – an Australian financial services company that specialises in the resource sector; providing funds management, equity research and corporate advisory services.

### **About Potash West**

*Potash West (ASX:PWN) is an exploration company focused on developing potassium-rich glauconite deposits in West Australia's Perth Basin. The Company aims to define a substantial resource base and investigate how best to recover phosphate and potash from the mineral. The project is well situated in relation to infrastructure, with close access to rail, power and gas. A successful commercial outcome will allow the Company to become a major contributor to the fertilizer market at a time of heightened demand.*

*The Company has a major land holding over one of the world's largest known glauconite deposits, with exploration licenses and applications covering an area of more than 2,000km<sup>2</sup>. Previous exploration indicates glauconite sediments are widespread for more than 150km along strike and 30km in width.*
