PWN BARCLAY WELLS RESEARCH REPORT 4 JUNE 2014

Barclay Wells Limited recently released a commissioned research report covering Potash West. To view a copy of the report, please visit our website at www.potashwest.com.au under Investor Centre – Research Reports.

Barclay Wells Ltd is a boutique financial services firm with offices in Melbourne and Perth, Australia advising both retail and wholesale clients across a range of investments, including listed and unlisted shares, derivatives and managed funds. Barclays Wells has a particular focus on derivatives and primary market capital raisings, with an emphasis on junior mining company capital raisings.

About Potash West

Potash West (ASX:PWN) is an exploration company focused on developing potassium-rich glauconite deposits in West Australia's Perth Basin. The Company aims to define a substantial resource base and investigate how best to recover phosphate and potash from the mineral. The project is well situated in relation to infrastructure, with close access to rail, power and gas. A successful commercial outcome will allow the Company to become a major contributor to the fertilizer market at a time of heightened demand.

The Company has a major land holding over one of the world's largest known glauconite deposits, with exploration licenses and applications covering an area of more than 2,000km². Previous exploration indicates glauconite sediments are widespread for more than 150km along strike and 30km in width.
